1ST PARTY DATA AUDIENCES

Target Group Family	Target Group Category	Target Group Characteristics	Use Case
TGP Habits & Values	Buyer Type	Influencer	This characteristic can be used to reach users who serve as opinion leaders for other consumers e.g. in the fields electronics, interior design, fashion or gaming.
		Frequent Shopper	Choose this characteristic to reach frequent shoppers, which are particularly interesting for fashion manufacturers, (online-) stores and electronics manufacturers.
	Purchase habits	Shopping locations	By selecting the shopping location feature you can target users who usually shop at selected retail chains.
		FMCG (Food)	These characteristics can be used to approach buyers of certain foods, e.g. sweets, cooking boxes or coffee.
		FMCG (Non-Food)	These target group characteristics can be used to reach shoppers who are characterized by a high purchase rate of non-food FMCG products such as cosmetics, hair and dental care.
		Pharma	This group of target group characteristics can be used to reach users who consume selected health products, e.g. vitamins, cold remedies or painkillers.
	Media usage behaviour	Film genre	By selecting according to media usage, it is possible to address users with particularly pronounced parallel media usage behavior. In this way, advertising can be adapted to the changing usage habits of our society and allows cross-media storytelling. Regarding on film genres, you are able to select between a variety of different genres such as historical movies, horror, romance or western.
		Gamer	
		Cinemagoers	
		Online Streamer	
		Reader	
		TV channel	

1ST PARTY DATA AUDIENCES

Target Group Family	Target Group Category	Target Group Characteristics	Use Case
TGP Business to Business	Decision-maker	Decision-maker	Targeting decision-makers in companies increases the chance of winning a contract. These target group characteristics can be used to select decision-makers by industry or by company size.
		Decision-maker (car affinity)	
		Decision-maker (finance affinity)	
		Decision-maker (IT affinity)	
		Self-employed	
		Decision-maker (small enterprises - 1 to 20 employees)	
		Decision-maker (medium enterprises - 21 to 500 employees)	
		Decision-maker (large enterprises - 500+ employees)	

1ST PARTY DATA AUDIENCES

Target Group Family	Target Group Category	Target Group Characteristics	Use Case
TGP Technical	Weather targeting	Temperature + good / bad weather or temperature + sun, clouds, fog, rain, snow, thunderstorm	Weather Targeting allows to set ads for "Good weather" and "Bad weather". Predefined campaign ads are activated depending on the weather condition.
	Time-of-day targeting	Specific time range in one day	Use Time-of-Day Targeting to reach your target group at specific times, for example in the evening during prime time or in the morning directly after getting up.
	Browser targeting	Chrome, Safari, Firefox, Opera, Edge, Internet Explorer and more	Browser Targeting specifically addresses the browsers used when surfing the Internet. For example, a Firefox or Chrome user can be presented with a different ad than a Safari user.
	Operating system targeting	Windows, iOS, Android, Linux and more	Operating System Targeting allows users of different desktop or mobile operating systems such as Windows, iOS or Android to be addressed. This is interesting for software manufacturers, app service providers or advertisers with products that require certain technical features.

1ST PARTY DATA AUDIENCES

Target Group Family	Target Group Category	Target Group Characteristics	Use Case
TGP Technical	Device targeting	Manufacturer: Apple / Samsung / LG / Huawei / Nokia / HTC / Blackberry and more	With the help of device targeting, you can take advantage of users' technical preferences for certain manufacturers of devices and systems such as laptops or smartphones.
	Connection targeting	WIFI / Mobile / WWAN / GPRS / EDGE / 5G / LTE and more	Targeting the connection type or its speed allows you to optimize advertising by, for example, only playing video ads on devices with a sufficient connection quality.
	Provider targeting	Vodafone, O2, Telekom, 1&1 and more	Provider targeting allows you to address a target group according its respective network provider.

TARGETING SOLUTIONS

Target Group Family	Target Group Category	Use Case
Retargeting	Dynamic Product Retargeting	With Dynamic Retargeting, users can be recognized on our portals and retargeted with dynamic advertising materials that are individually adapted depending on which page or product a user has viewed it. This form of retargeting works well for conversion optimizations.
	Static Retargeting	This form of targeting is used to recognize visitors from other websites on our portals in order to address them with corresponding static advertising content. This is particularly meant to address shopping cart or payment dropouts to offer them once again a special offer.
CRM Onboarding	Customer Onboarding	The existing customers approach allows to identify and address user's also active on our portals. A perfect customer loyalty opportunity!
	Customer Lookalike	With the help of Customer Lookalike, it's possible to identify and address similar new customers to existing customers on our portals. This way, your customer base can be expanded efficiently without major wastage.

TARGETING SOLUTIONS

Target Group Family	Target Group Category	Use Case
Customised Targeting	Individual Audience	This solution enables to create Individual Audiences that are not yet in our portfolio. This allows you to address target groups that are perfectly tailored to your needs.
	Automatic Audience	Automatic Audience is perfect for mapping non-standard targeting characteristics. This self-learning audience automatically optimizes itself through profiles of users that clicked on the campaign, and as well can be used to promote products whose target audience is not yet clearly defined.
Storytelling	Viewer / Clicker Re-addressing (2 Steps)	Banner Retargeting is used to retarget users who have already seen a particular ad, and to build up storytelling and thus increase purchase potential for performance or branding of awareness campaigns.
	Brand-Formance Campaign (3 Steps)	Brand Formance Storytelling ensures an emotional structure of a campaign by determining the sequence from branding to performance creatives. The sequence of the creatives over 3 different steps can be easily controlled across all screens in a contact-dosed manner.
	Sequency Campaign (3 Steps)	Sequency Storytelling can be used for both performance and brand awareness and allows an optimal contact dosage across different steps to create a positive brand image with the user.

TARGETING SOLUTIONS

Target Group Family	Target Group Category	Use Case
Cross Device Targeting	Cross Device FC	Cross Device Frequency Capping enables contact-dosed targeting across all screens and can also form the basis for an orchestrated multi-screen storytelling campaign.
Insights	Customer Insights	Customer Insights enables you to determine precise information about your target group and helps you to find out which target group characteristics make up the customers of your company.
